## **Dear Cattle Producer,**

We are again enjoying a wonderful summer with grass still green and growing after unusually heavy December and January rain. We had 103ml in one day this week! All this after a very dry winter and early spring period. Our hearts again go out to those who have suffered the effects of extreme weather conditions throughout eastern Australia. Thankfully no serious fires in the east to worry about yet.

Our sale bulls have done well and it is probably the best team we have offered to date.

We all know how the market has slipped – way too much – and it can only improve as the season progresses.

I have noticed that Hereford breeders still have faith in the future as the sales up North were very strong considering the store market at the time. The calf sales have opened on a brighter note which also is very encouraging.

Last year we again purchased some very good sires.

The first is a great Yarram Lottery H220 son, YPHS166 whom we call Samsung, for \$36,000. Then came two poll bulls from Valma in Tasmania. One very stylish bull, Valma Savage, cost \$30,000 and then we bought a very meaty bull with outstanding growth figures, Valma Safehouse, for \$16,500. Both bulls are by Yarawa South Paradise who is breeding consistently well for Valma.

Later we were able to purchase another Quamby Plains sire for \$22,000. Quamby Plains Stanley, OPCS054, follows in the footsteps of Quamby Plains Quandary, whom we bought two years ago and who is breeding very well for us. In fact, some of his first progeny is in this year's sale.

Principal Poll sires of bulls in this year's sale include Kerlson Pines Nardoo, Allendale Jet, Quamby Plains Quandary, Centennial Gamble, Banemore McLaren and Warringa Quincey.

The main Horned sires featuring sons in the sale are Battalion Bomber, Newcomen Nebraska, Yarram Storm N090, Yarram Mojo Q086, Mawarra Embark and Yarram Lottery M089.

We retained over 100 bull calves at marking in July. In October, all bull calves are grouped and classed by Mat Marshall in tandem with Michael Glasser. The number to retain as bulls

is reduced to somewhere in the 80s. The following year in December, those bulls are again classed and put into lot order for cataloguing for the March sale. Much attention is given to structure, temperament and overall soundness, together with their general qualities as top meat-producing sires.

This process gives a good deal of confidence to our guarantee that goes with every bull sold and is referred to later in this catalogue. We try to provide sound working animals but sometimes things do go wrong. That's life. We would appreciate any queries regarding any problems in a bull to be backed by a veterinarian examination.

Sale day weights will be available on a supplementary sheet and bulls we feel will be suitable for joining to heifers will be identified with an H.

This year we are again selling by video auction in our sale barn. The sale will be interfaced with AuctionsPlus and video live streamed.

The photos in this catalogue and the video are the work of specialist in the field, Brandon Sykes. This concept that is now widely accepted in the industry. The bulls will be displayed as usual and are only a short walk to inspect should anybody wish to do so during the auction. We again thank Geoff Moncrieff, who scans our bulls each year, and veterinarian William Whiteley who conducts our breeding soundness examinations in accordance with the accepted protocol. With our extensive AI program, we are reliant on the expertise of our AI technician, Tim Faithfull, who also pregnancy tests all our joined females efficiently and accurately.

Our sale is conducted by Elders Bairnsdale and auctioneered by Ryan Bajada.

All are experts in their field and we appreciate and thank them for their support throughout the year. Likewise, we would like to warmly thank all other purchasing agents and their clients.

Sale bulls were on display at the Field Days on January 29 and will be available for viewing again on Wednesday 6 March, the day of the Ensay and Omeo Calf Sales. Enquiries are welcome anytime and additional viewings by arrangement. We would be pleased to see you at Kanangra for our 21st sale on Wednesday, 13 March 2024.

*Barry Newcomen*

## **Inspection**

The sale bulls will be available for inspection on Wednesday 6 March, the day of the Ensay and Omeo Calf Sales, or at any time by arrangement. We would be glad to show you around. Please call us to arrange a time.

## **Breeding Soundness**

Bulls for this sale have been examined for breeding soundness using a protocol agreed upon between Herefords Australia and the Cattle Vets Association.

## **Health**

All sale bulls have been vaccinated with CSL Ultravac 5-in-1 and treated with Vetmec and Dectomax products throughout their life. They have been ear sample tested negative to pestivirus and have had a course of pestivirus injections. The stud is EU and J-BAS-6 accredited.

## **Dehorning**

All Newcomen Herefords horned sale bulls are dehorned. Despite our most diligent efforts some bulls persist on growing small scurs. These scurs are included in the two-year guarantee. Any bull requiring veterinary treatment on the scurs within the first two years will be settled by the vendor, providing we are first consulted.

## **The Newcomen two-year guarantee**

All breeding cattle sold by Newcomen Herefords are fertile and structurally sound to the best of our knowledge. If an animal becomes infertile or breaks down due to reasons other than injury or misadventure, at any time in the next two years, we will:

1. Provide you with a satisfactory replacement if available, or
2. Issue you with a credit equal to the purchase price less the salvage value to be used to purchase any animal in future Newcomen Herefords sales.

This is not a Life Assurance Policy. Normal care needs to be taken as we cannot replace an animal that is injured or dies for any reason. We recommend you insure all animals purchased against injury and death. An insurance representative will be available on sale day. Any claims are to be accompanied by a certificate from a registered veterinarian. All vet costs are the responsibility of the purchaser.

## **Initial care of your new bull**

All our bulls have been run in groups throughout their life. They are not used to being alone so it is imperative you provide some company for them from the moment they are unloaded from the transport. Once the bull becomes familiar with his new surroundings, you can choose to move the other stock away from him.

All the bulls have been handled with cattle dogs, horses, motorbikes, by vehicle and on foot so they will adapt to whatever you use, but remember to give them time to adjust to their new surroundings.

## Bull name and classification

After the name of a bull in our catalogue there is a letter in brackets which identifies its breeding status.

- (H) means the animal is of horned genetics of at least five generations. Only (H) bulls can be used in a horned stud if it is to remain as a horned stud.
- (P) means it is a polled animal.
- (S) means it is an animal of poll breeding but has small horns or scurs.
- (H#) means the animal has some poll genetics but has horns.
- (PP) Homozygous Poll.

A poll stud can use all four of the types whereas a horned stud can only use (H).

In addition to those classifications some bulls also have the letters (HPR) after their name. This means the bull is Herd Performance Recorded or is a commercially-bred bull rather than a registered stud animal.

A 21st birthday has always been reason to celebrate.

As Newcomen Herefords clocks up its 21st annual bull sale this year, I have much to celebrate.

I turn 86 years old this June, making me 63 when I had the slightly hairbrained idea to expand our commercial enterprise into a stud in 2001. Most people start to think about winding down in their 60s but I love farming now as much as I did at 25 years of age – and at 63!

True, I don't always love it when drought hits and you have to think outside the box to keep the weight on your animals. I've always believed you have to feed your cattle so that they are ready to bounce back once the drought breaks. So, we've spent a lot of money on fodder over the years. I remember one particularly tough year, I'd lop limbs off the willow trees to give the animals the green leaves to eat.

But, if you raise animals they can only give their best if you give them your best and I never like to see animals suffer, particularly through starvation. So, I've bought hay, I've made hay, I've bought and made silage, I've bought pellets and I've stockpiled as much hay and silage as I can for those tough years. We've also made extensive use of agistment from friends at Ensay, Benambra, South Gippsland, the Central and Western Districts, the North-East and Wimmera.

It's a philosophy that has allowed me to keep building the quality of my herd and I'm proud of how far we've come in 21 years as a stud.

And, what better way to celebrate a 21st than with a new website and moving to the Livestock Management software program, Stockbook?

Most of you will know, I'm a little technologically challenged, but just because it doesn't come naturally to me as it does for the kids of today, doesn't mean I don't appreciate and value what it can do for businesses. I'm always looking at ways to improve and learn and if there's one thing I know, it's that you're never too old to learn something new and to try new ventures.

Thank you to all the people who have had a part to play over the 21 years of our stud, particularly my wife Topsy, who supported me when I proposed starting a stud and has supported (almost!) every decision to buy a high-priced bull or to forego that holiday to feed animals in drought.

I couldn't have done what I've done without the help of family and friends. To all of you – and you know who you are – thank you!

Happy 21st Birthday to us.

Barry.

**Please visit our new website at  
[www.newcomenherefords.com.au](http://www.newcomenherefords.com.au)**

See our beautiful Ensay country in photos and videos, watch a video about our breeding philosophy and read more about our foundation sires.

Here's a taste of what you can expect on our website.

**ABOUT US**

Newcomen Herefords was founded by Barry and Topsy Newcomen at their picturesque Ensay property in December 2001.

It was an extension to their successful commercial enterprise which, to this day, continues to produce weaner calves among the tops at the prestigious Mountain Weaner Calf Sales at Ensay.

Starting out as a stock agent working at AML&F in Melbourne, Barry returned to his hometown of Ensay and bought 442 acres in partnership with his brother Evan in 1959. They added acreage over the years and teamed successfully for 34 years, trading as BC & EO Newcomen to establish one of the best commercial herds in the area and even now, farming independently, the brothers continue to provide regular toppers of the market.

In the early days, the brothers farmed sheep and cattle, producing 204 bales of wool in the early 1990s before moving solely into cattle on more than 5000 acres.

In 1994, Barry went into partnership with his wife Topsy, and in an ongoing effort to improve their commercial herd, they acquired several

top-class sires which soon created a demand from local breeders for a good bull calf. Interest escalated and so the seed was planted which resulted in their stud.

The stud was founded with the purchase of seven cows and eight calves from Dunoon. Then in May 2002 and with a vision to the future, Barry and Topsy purchased the promising stud sire Kaludah Monopoly for \$24,000 at the Wodonga National Show and Sale. It was to be a pivotal point in the fledgling stud's history and the sire's last natural son sold at the 2011 sale. His sons returned at auction a grand total of \$254,000.

*Thanks to Grant at James Yeates Printing for the website design and to Maddison at EE Media, for the beautiful photos and videos.*

# Boost Livestock performance

with Anipro Liquid Supplements.

**Anipro**  
Liquid Supplements

## Customised nutrition supplements delivered straight to your paddock

Improving results in livestock systems requires year-round nutrition planning. Anipro is a molasses-based liquid supplement that complements the forage you have available to optimise health and condition and therefore boost production, performance and profitability in your herd.

### KEY BENEFITS

- ✓ Molasses based liquid supplement
- ✓ Provides essential protein, minerals and vitamins
- ✓ Up to 27% improvement in forage intake
- ✓ Fully serviced program saves time and money
- ✓ Promotes improved digestibility in dry feeds, hays, and stubbles
